

Knights Corona activity protocol

03-06-2021

Health checks & registration

For each activity both registration and a health check are required. Either the washing or disinfection of hands of all participants will occur before each activity
Registration occurs via app.kotkt.nl. Registration requires an account. Once the maximum number of participants is reached further registrations are no longer possible.

Before each activity people are required to fill in a health check. The health check will be done by respectively a physical form given (by the organisers) at the start of an activity or through an E-mail at the board. We plan on eventually replacing or complementing this with an online questionnaire. The board will check that all participants have completed the health check, the organizers will log who participated and ask verbally to the group whether they performed the health check (this is the last option to withdraw from the activity without repercussions. If the question is not asked by the organisers you don't get that chance.). If people are at an activity without completing a health check they will be suspended for no more than one month from (off-line) activities. People who joined an off-line activity without registering beforehand will be suspended for no more than two months, from (off-line) activities, as well. For both, the board has a chance to give one warning before these measures take effect.

Activities

Tea@Knights

The Tea@ will take place either outdoors on a quiet part of the campus or in the common room ('the Bunker') of Luna.

If outdoors the chairs will be placed at least 1.5m apart.

Inside the chairs will be placed at least 1.5m apart, or the seats will be marked and participants are required to wear a mask when not seated and when people are still trying to find a seat.

Hand disinfection is offered at the entrance, use is mandatory as mentioned earlier.

Roleplay sessions

The ST will keep track of attendance and is responsible for the observation of the corona rules.

The maximum number of participants is dictated by the size of the booked room. Participants are required to maintain 1.5m distance. Participants are encouraged to bring their own materials and not share them with each other.

The ST will assign one person (possibly him/herself) to pick up all the required material (including hand disinfection gel) from the Knights room.

Board Game sessions

Everyone can subscribe to a planned session. The number of participants is dictated by the size of the booked room. Only one person will pick up the required material.

The person that started the slot will be responsible to maintain the covid rules including the 1.5m distance.

IW sword fighting training

The IW larp sword fighting training will happen in an outdoor setting and will be limited to a maximum of 50 people. Hand disinfection is offered prior to the training.

The IW training is a sport activity and therefore does not have a requirement to wear masks or keep 1.5m distance. People are requested to not gather until 15 minutes before the activity. Before the activity people are required to wear masks and keep 1.5m distance. One of the organisers will go inside and get the required materials (larp swords). Each participant will only touch one sword.

At the end of the activity one of the organisers will return the materials. The participants are asked to disperse as soon as the activity ends and not linger.

We will not actively try to stop onlookers as long as they keep their distance from us.

LARPs

There is much discussion among larpers about which rules are possible to keep during Larp. It is very much based on social interplay and therefore difficult to partake in while observing the measurements. We have decided to go for a stricter rule-set though not the full coronarules.

There is a limit of either 50 people, or the number of people dictated by the room size for the activity, whichever is lower. There will be a health check before the activity. People are asked not to gather until 15 minutes before the event. There will be a briefing over the corona safety rules at the start of the event.

The Larps organised by the Knights need to happen indoors. The room will be large enough to house the participants and the pathways will be kept wide enough for two people to pass at 1.5m. (The lecture hall Corona could provide such space after some chairs are removed.)

Larp is a (improvisational) theatrical activity. It is not feasible to wear masks and keep 1.5m distance during the activity. This is contained in the government's exception for cultural practice. Direct physical contact will be avoided. Hand sanitation will occur before the larp starts.
